

This course will give you an understanding of the various classifications of quick hitch devices and is delivered through a combination of classroom and practical instruction. On completion of the course, the excavator operator will have a basic theoretical understanding of how to change a manual, semi-automatic and fully automatic quick hitch attaching system.

Under the HASAWA 1974 and PUWER 1998 all employees and employers have a statutory duty to ensure training is carried out to perform work with work equipment.

Duration	Certificate	Number of Participants	Delivery	Assessment
Half a Day	Valid for 3 Years	Up to 6	Classroom and Practical Instruction	Multiple Choice and Practical

Who is it for?

All excavator operators who use quick hitch attachment systems. This course is suitable for those who have received no formal instruction or for those who have experience in the use of Quick Hitches and wish to refresh or update their skills.

What does it cover?

- Identify the Risks Associated with Quick Hitch Devices.
- Fit and Operate Ancillary Equipment.
- Describe the Operator's Legal Duties regarding the use of Quick Hitches.
- Describe and Apply Safe Working Practices for the use of Quick Hitches.
- Connect and Disconnect Attachments Safely.
- Know how to Conduct Visual Inspections of the Quick Hitch Equipment.
- Maintenance of the Quick Hitch Equipment.
- Test Connections Appropriately.
- Understand the Importance of following the Manufacturer's Specifications for use.
- Understand the Relevant Aspects of the Legislation.

On completion of the course:

All candidates successfully completing the course in full will be awarded an MGL Group Training Services Certificate.
