

The objective of the course is to provide training for individuals who wish to operate a crusher / screener at a competent level. This is delivered either as an in-house training course at your own premises using your equipment.

Duration	Certificate	Number of Participants	Delivery	Assessment
Dependent upon candidate ability and experience	In-house	1-3	Classroom and Practical at Customers Premises	Theoretical and Practical Assessment

Who is it for?

All Plant Operators who use crusher / screener. This course is suitable for novices, intermediate level or experienced operators who need to refresh their skills or achieve a certificate of competency.

What does it cover?

All aspects of theoretical and practical skills in the operation of a crusher / screener:

- Name and explain the purpose of principle components, the basic construction, controls and terminology.
- Conform to manufacturers requirements as per the operator's handbook, other types of information source and relevant regulations and legislation.
- Undertake all pre-start use checks.
- Configure and set for travel (mobile units).
- Travel over rough, undulating ground and level surfaces.
- Manoeuvre in confined spaces (mobile units).
- Configure and set for crushing duties to produce aggregate to specified sizes.
- Explain actions required for hazards, underground and overhead services.
- Crush different types of materials.
- Sort materials into graded sizes.
- Control and maintain the work flow rate.
- Use appropriate communication procedures before and during work.
- Explain procedures for blockages and foreign object removal.
- Clean down the plant machinery and working area.
- Carry out shut down and securing procedures.
- Explain the loading, unloading and machine disassembly procedures for machine transporting.

On completion of this course:

All in-house candidates successfully completing the course in full will be awarded an MGL Group Training Services Certificate.
