

This course provides the delegates with the theoretical and practical skills to undertake licensable work. Persons requiring this type of training would be working for an asbestos license holder as defined in CAR 2012 (Regulation 8), or undertake ancillary works under the supervision of a Licensed Asbestos Removal Contractor.

Duration	Certificate	Number of Participants	Delivery	Assessment
Three Days	Valid for 1 Year	Up to 8	Classroom and Practical Instruction	Multiple Choice and Practical

Who is it for?

Any persons carrying out licensable work with asbestos containing materials, as laid down in CAR 2012. This would normally include, but is not limited to, licensed asbestos removal contractors and ancillary trades such as scaffolders who undertake licensed asbestos ancillary work, companies maintaining negative pressure units and Class “H” Vacuums and those required to enter into enclosures to carry out other ancillary work.

Initial training is required for employees new to licensed asbestos work or those who are returning to the industry after a period of absence.

What does it cover?

- | | |
|---|--|
| Types, Uses and Risk of ACM's Legislation | Health Hazards of Asbestos |
