

WASTE CARRIER REGISTRATION REQUIRED

Important information for all drivers delivering business, construction or demolition waste

If you transport waste as part of a business, you must hold the correct waste carrier registration.

This includes SMEs, sole traders and builders carrying waste produced through their own work.

BEFORE ARRIVING AT NEWBURN

- 1 Bring your valid waste carrier registration number.
- 2 Ensure the registration matches the legal business or sole trader transporting the waste.
- 3 Provide the business name, full address and postcode.
- 4 Provide the vehicle registration and the correct waste transfer note.
- 5 Ensure the waste description and EWC code accurately describe the load.

CONSTRUCTION AND DEMOLITION WASTE

Upper-tier registration is normally required. This applies even when a builder or contractor is carrying waste generated by their own work, including rubble, soil, timber and strip-out materials.

NO VALID REGISTRATION?

The load will not be accepted where a required waste carrier registration cannot be provided or verified.

Please contact your employer before travelling to site if you are unsure.

WHAT THE WEIGHBRIDGE WILL CHECK

Business name • Registration number • Registration status/tier • Address and postcode • Vehicle registration • Waste paperwork

Check your registration before travelling: GOV.UK - Register or renew as a waste carrier, broker or dealer
